

# Lab Sheet #4

Internet Applications, 14013104-3

Week #8, Monday 19 October 2020

Using the answer of lab #2, add document-level CSS language to create the web page similar to the following figure 1.

- Download the file (Lab2\_Answer.html) from the attached compressed file
- Copy the file (Lab2\_Answer.html) to a new file (Lab4\_Answer.html)
- Update the file (Lab4\_Answer.html) to obtain the web page shown in figure 1

The image shows a web browser window with a single tab titled 'Lab 2'. The address bar displays 'Lab2\_answer.html'. The browser's menu bar includes 'File', 'Edit', 'View', 'History', 'Bookmarks', 'Tools', and 'Help'. The search bar contains the text 'Search'. The main content area features a registration form with the following fields and options:

- Name:** A text input field with the placeholder text 'Enter your name...'. The label 'Name:' is in blue.
- Phone:** A text input field with the placeholder text 'Enter your phone number...'. The label 'Phone:' is in blue.
- Country:** A dropdown menu with the placeholder text 'Please select your country...'. The label 'Country:' is in blue.
- Gender:** Two radio buttons labeled 'Male' (selected) and 'Female'.
- Languages:** Four checkboxes labeled 'English', 'Arabic' (checked), 'French', and 'Italian'.
- Email:** A text input field with the placeholder text 'Enter your email address...'. The label 'Email:' is in blue.
- Password:** A text input field with the placeholder text 'Enter your password...'. The label 'Password:' is in blue.
- Confirm Password:** A text input field with the placeholder text 'Enter your confirm password...'. The label 'Confirm Password:' is in blue.

At the bottom of the form is a green 'Register' button.
