

Lab Practical #2

Internet Applications, 14013104-3

Week# 7, Monday 12 October 2020

*Download the Lab2.html file and use the **external CSS** style (you could name the external CSS file as **styles.css**) to do the following:*

1. Make the font size of the whole page to be 75%
2. Use the font families verdana, arial, sans serif for the whole page
3. Make the back color of the page as lightgrey
4. Make the foreground color of the whole page as blue
5. Leave page margin of 70px
6. Color the table header's background as pink
7. Use circle for unordered list and upper-roman for the ordered one
8. Color the URL link by blue when un-visited
9. Color the URL link by green when visited
10. Set the hover pseudo class of the link to yellow color
11. Set the active pseudo class of the link to red color and yellow background

After performing these styling, your page should look like the following figure:
